

# SMARTeZ® Pump

## Supports Alternate Site **Patient Care**

**Expect No Less**

of any single-use infusion pump

Available on the  
**AppStore**

### Overfill-Underfill Check

Scan the QR Code or input the Volume and Flow Rate of the SMARTeZ® Pump.

A Min-Max Volume range appears. User inputs the desired fill within this range and the corresponding infusion duration is displayed.

### Volume Scan

Capture 3 images of the SMARTeZ® Pump inside the frame displayed on the iPhone.

There is a corresponding QR code to assist the focus for each image.

Patient-user will receive a response giving the remaining volume in the SMARTeZ® Pump. This information is useful - any abnormality in flow rate or occlusion would become obvious.

### IV Monitoring

User or patient-user captures 3 images of the SMARTeZ® Pump similar to Volume Scan steps, at pre-selected time intervals.

An estimated time for End of Infusion with optional alerts is provided. This alert not only prepares the patient-user for end of infusion procedures but also takes away uncertainty on the end of infusion with elastomeric devices.
